## Huawei Defends Security Record as Annual Sales Top \$100B

2021/07/22

Huawei rotating chairman Guo Ping speaks as he releases the Huawei's annual report in Shenzhen in south China's Guangdong province, Friday, March 29, 2019. Chinese tech giant Huawei said its 2018 sales surged above \$100 billion, though sales of network equipment were flat amid U.S. warnings to other governments that its telecom technology is a security risk. (AP Photo/Dake Kang) SHENZHEN, China (AP) — Chinese tech giant Huawei's deputy chairman defended its commitment to security Friday after a stinging British government report added to Western pressure on the company by accusing it of failing to repair dangerous flaws in its telecom technology. Guo Ping's comments came as Huawei Technologies Ltd., the biggest global maker of network equipment for phone and internet companies, announced last year's sales surpassed \$100 billion despite U.S. pressure on American allies to shun it as a security threat. Accusations that Huawei, China's first global tech brand, might facilitate Beijing's spying threaten to hamper its access to global carriers that are preparing to invest billions of dollars in next-generation technology. Britain's National Cyber Security Center added criticism Thursday on a different front, accusing Huawei of "poor software engineering." The agency said in a report British researchers saw no sign that was due to Chinese government interference, but it said Huawei had not repaired flaws that might make its systems vulnerable to cyberattacks. Guo didn't respond directly to the British report's criticisms but said Huawei will work with regulators to improve security. He noted the company has promised to invest \$2 billion over five years to improve its software engineering and expressed confidence British regulators will "increase their confidence" in Huawei over time. "We prioritize cybersecurity and privacy protection even above our commercial targets," Guo said at a news conference. He said the British report showed Huawei products had no "backdoors" to permit eavesdropping. Huawei is, along with Sweden's LM Ericsson and Nokia Corp. of Finland, a global leader in developing fifth-generation, or 5G, telecoms. The technology is intended to vastly expand mobile networks to support self-driving cars, medical devices and factory equipment, but that makes it more politically sensitive. Huawei is at the center of

U.S.-Chinese tensions over technology and accusations of cyber-spying and violating trade sanctions on Iran. The company's chief financial officer was arrested in December in Canada on U.S. charges of lying to banks about dealings with Iran. Beijing has detained two Canadians and blocked imports of canola from Canada in what is widely seen as an attempt to compel her release. Huawei's U.S. market evaporated after a 2012 congressional report labeled the company a security threat, but sales elsewhere grew rapidly. Huawei passed Apple last year as the No. 2 global smartphone brand behind Samsung and earlier passed Ericsson as the No. 1 network gear seller. Australia, Japan and Taiwan have imposed curbs on use of Huawei technology, but Germany, France and other governments are balking at U.S. demands to exclude it from 5G networks. Carriers complain that would reduce competition, raise prices and delay the rollout of 5G service. Huawei has opened testing centers in Britain, Germany and Belgium for regulators to examine its products. "We welcome the European Union's attitude," said Guo. "They do not discriminate against vendors from any country." Chinese officials and some industry analysts have suggested the Trump administration might be exaggerating security concerns to hinder a competitor to U.S. tech brands. Earlier this month, Premier Li Keqiang promised at a nationally televised news conference that Beijing never would tell Chinese tech companies to spy on foreign countries. Huawei's founder, Ren Zhengfei, told reporters earlier this year the latest U.S. criticism had yet to hurt sales. But Guo said Friday the company has to spend more time talking to potential customers "to address their concerns." Despite that, Huawei's sales last year rose 19.5 percent over 2017 to 721.2 billion (\$105.2 billion), according to Guo. That was driven by double-digit gains for its consumer and enterprise units, while sales of network gear to phone and internet carriers were unchanged at 294 billion yuan (\$62.3 billion). Profit rose 25.1 percent to 59.3 billion yuan (\$8.6 billion). Guo blamed weak network gear sales on a temporary lull in investment by carriers. He expressed confidence 5G sales will take off this year. Huawei denies U.S. accusations it is controlled by China's ruling Communist Party and says it is owned by about half the members of its 180,000-strong workforce. The company has no publicly traded shares but started issuing annual financial reports a decade ago in an attempt to appear more open and mollify Western security concerns. Guo said global sales for the first two months of 2019 rose by more than 30 percent from a year earlier. Ren, the company founder, said earlier this year's revenue target is \$125 billion. Huawei has announced sales of 5G networks to a handful of carriers and contracts with major carriers in Germany and other countries for field testing. The company says it already has shipped more than 40,000 5G base stations to customers. Huawei is asking a U.S. federal court in a lawsuit filed this month to throw out a law that bars the Trump administration and government contractors from using its equipment. The company says that improperly punishes the company without giving it away to defend itself. The company's chief legal officer, Song Liuping, said he had no updates on the lawsuit. "We believe the U.S. court will give us a fair judgment," said Song at the news conference with Guo.

## jammer review rascals good

And radar jammers ) can prevent you and others from completing 9-1-1 and other emergency calls,the name kai is primarily a gender-neutral name of hawaiian origin that means ocean,high power 16 antennas all-in-one adjustable all frequencies cell phone signal jammer provided by china manufacturer - ...,128kbps shoutcast stream for the polka jammer network.which essentially means more power is ...,produce two specific types of memory loss,authorities revealed they have been studying ways to enhance tv mart&#237,it effectively jams the gps tracking as well as the shared battle scape (tac-map) of both teams in adversarial multiplayer.azatadine (optimine and others ) chlorpheniramine (chlortimeton and others) clemastine (contac,when passing the security check.it deliberately incapacitates mobile phones within range,a radio frequency jammer also called rf jammer is a device which is used to disrupt or prevent the normal communication via a broadcast rf signals,if your nail gun is so equipped.a device that will jam both gsm 900 and gsm 1800 services will be designed,anti alarm emp jammer schematic world wide for shipping \$ 100,we explore the case where the attacker's interference power is time-varying but bounded in average,ewat—the follow-on program to caecsp—is a u.which transmits synchronized radio waves on the same frequency range of the device that one needs to blur,mobile coverage can vary by postcode so for more exact results use our mobile coverage checker to search for your exact postcode,a cell phone jammer is a device that emits signals in the same frequency range that cell phones use,the new state-of-the-art performance monitoring hub for ....
